Consistently Focused on Client Success!

Feb. 2021

ACE Team Goals

ACE encourages our young and enthusiastic team to:

- Grow in Expertise.
- Grow in Confidence.
- Grow in Number.
- Grow in Delighting Our Clients with Superior Service – Going that Extra Mile!

Control Systems Engineering is a serious business... but it is also fascinating!

At ACE we have seen a massive increase in the number and variety of SCADA platforms and associated integration services.

Vendors are building systems that are more complex and do not integrate easily with other platforms and vendor packages. These include large SCADA servers, RTU and PLC. The new systems are bigger and more sophisticated than the traditional SCADA systems (e.g., Citect, arguably) but can be more expensive and difficult to integrate as well.

I believe that OPC based SCADA software is becoming more popular and easier to handle than proprietary software. For example, according to Automation World .Net Enterprise Solution let end users set and control the range of tags from 100 to 1,000,000 per server.

Some vendors outfit their software with cloud access that enhances the accessibility of the data, alerts and reports.

Today's end users are operating their SCADA systems rather than just owning them. Many have built elaborate user interfaces with mimics, symbols, templates, trends, animation and more.

Australian Control Engineering specialises in SCADA & Control Systems design and development with exceptional customer experience.

My team is here to help you customise and implement your SCADA systems.

However, the ultimate goal is to save our clients money and time.

Whenever an individual or a business decides that success has been attained, progress stops.

– **Thomas J. Watson Jr., president of IBM**

The only certain means of success is to give more and better service than is expected of you, no matter what your talk may be.

– **Og Mandino**

"Say you want to huff and puff and blow a house in...there's an app for that."

Happy Team, Happy Clients

Friday Team Lunch

We like to make sure that the team have an opportunity to have a few laughs over a healthy lunch. Helps to restore energy after a very busy week.

Of course, this lunch was before the most recent lock-down came into effect. Let's hope we can have many more in 2021.
