ACE TEAM GOALS

ACE encourages our young and enthusiastic team to:

- Grow in Expertise.
- Grow in Confidence.
- Grow in Job Satisfaction.
- Grow in Number.

Grow in Delighting Our Clients with Superior Service!

CLIMATE CHANGE Research Project

ACE NEEDS YOU!

Don't forget, we are always on the lookout for experienced and motivated control systems engineers, who want to work on some exciting projects. We would love to have you join the ACE

ACE Engaged in Climate Change Research Project!

There has been great excitement in the ACE Perth office recently. The team has been engaged in a climate change research project focusing on the reach of ocean creatures to discover their behaviour changes in different water conditions.

ACE programmed and tested the control system including PLC and HMI (human machine interface) that will be used by the scientists and researchers.

The system will be used to regulate the water input and output to an aquarium and treat the water before it goes into the tanks and control the temperature of the water. The HMI will log the data from the aquarium including temperature, chlorine, turbidity, salinity, level and so on. Subject to client permission, we hope to show some photos at the location very shortly. Stay tuned!

Yu Zhao

ACE: A "Boutique" Experience
One of our most influential clients (in the utility space) recently described the services that ACE provide as being "boutique". He went on to say: "That is why we keep coming back to ACE - we know they care". Our reward is to know that our clients view us differently.

"In order to be irreplaceable, one must always be different"

– Coco Chanel

"Each day is an occasion to reinvent ourselves"

– Ralph Lauren

Happy Team – Happy Clients

ACE SOCIAL NIGHT – Relaxing over a few beers!

Happy Client of the Month Scrap Metal Machine Control Systems Troubleshooting

An obsolete PLC prohibited our client's productivity and their site operation. Our engineers took on this challenge. They supported each other in resurrecting and troubleshooting the control systems. The client is over the moon. When the client is happy, we are happy!
