

# Australian Control Engineering (ACE)

We Go the Extra Mile for Our Clients!  
Newsletter - October 2021

## ACE TEAM GOALS

ACE encourages our young and enthusiastic team to:

- Grow in Expertise.
- Grow in Confidence.
- Grow in Job Satisfaction.
- Grow in Number.
- Grow in Delighting Our Clients with Superior Service!

## LEGACY SYSTEMS A Constant Challenge

Maintaining legacy control systems can be challenging. Whilst the obvious solution is to upgrade to the latest equipment, this transition can be risky. At ACE, our experienced engineers help our clients every step of the way - ultimately saving clients time and money.

## ACE Delivers on Recycling Facility!

At ACE, we celebrate the betterment of the environment and client's operation excellence. Our engineers appreciate the fact that their work creates direct impact to wider communities.

Pictured is a major **materials recycling and recovery facility** that we supplied automation products for its control systems.

By providing swift services with quality, our clients can rely on us to deliver within required timelines to meet their operational needs.

Remember, at ACE we grow great engineers that we can put to work on exciting projects immediately. We also need to identify the best young talent out there - and rapidly bring these young engineers up to speed. If you think that you fit either bill, then please give us a call.

*"The ultimate test of man's conscience may be his willingness to sacrifice something today for future generations whose words of thanks will not be heard"*- **Gaylord Nelson**

*"What's the use of a fine house if you haven't got a tolerable planet to put it on?"*- **Henry David Thoreau**

*"Environmentally friendly cars will soon cease to be an option ... they will become a necessity"*  
- **Fujio Cho, Honorary Chairman, Toyota Motors**

# Happy Team – Happy Clients

## ACE Becomes SEL Systems Integrator

ACE became SEL's (Schweitzer Engineering Laboratories) system integrator in Australia and received our SEL product training from Linitha Venugopal (WA Sales Manager). Photos are attached. Our improved knowledge will benefit our clients and end users for their power system protection, motor protection and automation projects.

### Congratulations to Finn Loos

Congratulations to **Finn Loos** for successfully completing his stage 2 ACE training hub program! We know that Finn has gained valuable industry insights and work experience. We look forward to further developing your engineering skills.

### Welcome to Lachlan

A big ACE welcome to **Lachlan Burnside** who has already hit the ground running. Lachlan has been participating in ACE's training hub to become a great engineer. Lachlan, we are really pleased to have you join our dedicated team.
