## *ACE "Engineering Smart Utilites"*

[White Papers](#)[Case Studies](#)[Our Focus](#)

Hi ,

Over the past few weeks we have experienced continued increase of demand for SCADA & Control System engineering services.

We have also been excited to welcome many of our established clients and partners to our brandnew headquarters on Level 5, 200 Adelaide Terrace in Perth.

If we have not yet had the opportunity to catch up, we would love to spend some time with you, around a whiteboard, so we can understand your challenges and how we can help. In the meantime, here is our latest news for August 2022.

## **ACE Enters Period of Rapid Expansion**

This has been a period of rapid growth for ACE as we establish ourselves as a market leader in the Control Systems and SCADA space , with a focus on utilities i.e. water, power and transport. We pride ourselves in the fact that we treat our staff as people with families, hobbies and a life out of work – not just as numbers. Everyone at ACE continues to contribute to our rapid growth.

---

## Water Corporation WA Visit ACE

We were very pleased to welcome a team of executives and project managers from Water Corp WA to visit our offices, meet the team and assess our capability. This was one of several visits in which we hosted key stakeholders from Water Corp during August. It is always a pleasure to show

our clients around, so that we can better understand their requirements, and dovetail our services to match client expectations.

## Engineers Australia – Award Night

ACE was honoured to participate in Engineers Australia's People and Projects Award Night sponsored by the Water Corporation of Western Australia. Our Managing Director, Yu Jordan Zhao, received a nomination for 'Professional Engineer of the Year'. ACE extends our congratulations to the winner of the award and all the finalists.

Yu Jordan Zhao (ACE, Managing Director) was very pleased to meet with **Chris Mears - Siemens, WA Manager**. Yu and Chris had a constructive conversation on the latest Siemens technology as well as the potential applications for Siemens technology in both the current and developing SCADA & Control Systems market.

This relationship will enable ACE to provide a wider range of SCADA engineering design and integration services to the utilities industry. **Yu Jordan Zhao** looks forward to working with **Chris Mears** and his team to provide enhanced support and innovative solutions to OT (operation technology) end users.

---

## ACE Builds Expertise as an SEL Integrator

As a SEL system integration partner, ACE is delighted to support local utility clients with their power system and control system design, programming, testing, installation, commissioning, and maintenance.

---

## Edith Cowan (ECU) Career Fair

ACE was honoured to participate in **Edith Cowan University's Career Fair**. Our project manager and engineers, who graduated from ECU, did an excellent job in promoting ACE's vision as well as the engineering profession. ACE extends our invitation to all talented engineering graduates to join ACE's internship and graduate mentoring program. Here at ACE, we strive to collaborate with universities to deliver the most innovative automation solutions to the utilities industry. We believe in contributing overall to the engineering profession by mentoring "next generation" graduate engineers to help them develop creative and robust solutions for the utilities sector. Our aim is to nurture their engineering professionalism, technical capabilities, leadership and entrepreneurial spirit, so that one day they may grow to inspire future generations.

# ACE Collaborates with TechnoGen

Our collaboration with **TechnoGen** enables **ACE** to increase our electrical & instrumentation engineering capabilities and vision. The Managing Directors for both companies, **Yu Jordan Zhao** of **ACE** and **Ramaish Nathan** of **TechnoGen**, have discussed a relationship to increase the support and services we both deliver to ensure we remain leaders in developing innovative and reliable outcomes for our customers.

---

## Welcome to Ali Nawaz

We are excited to welcome **Ali Nawaz** as a SCADA Engineer Intern. Ali is looking forward to fast-tracking his engineering career with **ACE** and contributing back to the community.

---

We understand that it's important to deliver your projects on time and budget.
