

ACE Needs You! - Let's Grow Together...

Hello ,

It has been an amazing start for 2022! It seems as though the year has only just begun, and already we have been notified that ACE has been successful in several high profile tender submissions - particularly in the utility sector. This is the area where we excel thanks to our wonderful clients and our high calibre team of SCADA & Control Systems specialists.

We welcome more engineers to join us in this exciting journey to help build the future of utilities for our community!

Introducing "ACE NCR" - our National Customer Response Team - we are now hiring in Brisbane,

Hobart and Perth

As we strive to support our rapidly growing, national client base, we want to hire the "best of the best" and remunerate them well. We're building a culture at ACE where amazing people (like you) can do their best work. Are you keen to grow your career and help some of Australia's leading utility organisations to serve the community? Do you want to expand your horizons by working with an extensive network of elite **professionals** and **entrepreneurs**? You've come to the right place!

If you are an energetic person with great SCADA and Control Systems experience, we want to hear from you.

ACE Signs Agreement with SEL

We are pleased to announce that ACE has been appointed the official SEL (Schweitzer Engineering Laboratories) system integrator in Western Australia. We are excited and certainly looking forward to working more closely with the SEL team (both locally and globally). Together, we will provide superb products and services to our clients.

Switchroom Control System Testing - ACE Engineers Work on a Newly Built Switch Room

This testing is for the switchroom for power generation infrastructure. It includes communications, I/O (inputs and outputs) and protection testing. This process is necessary to ensure smooth operation of our client's power plants and supply to their local users.

The switch room will be performing an important role in supplying power to WA mines and nearby infrastructure. Therefore ACE engineers were taking extra precaution in their testing processing, double checking and triple checking the outcomes to mitigate against problems during the site commissioning.

Juan Carlos Herrera & Namira Rofik Allway Wedding on 20th February 2022

Our staff member - Carlos has been a happy engineer at ACE but become even happier with his marriage to the lovely Namira. Congratulations to the happy couple!!!

"Happy team and happy client, Happy wife and happy life"

Work life balance plays an important part in creating a happy life for our employees.

ACE Needs YOU!

Due to rapid expansion in the utility space across Australia, we need experienced control systems engineers and project managers to join our specialist team.
